“We are drowning in information, while starving for wisdom. The world henceforth will be run by synthesizers, people able to put together the right information at the right time, think critically about it, and make important choices wisely.”

- E.O. Wilson, 
Conscience: The Unity of Knowledge 1998
VISION 2032

Our current focus is on developing our next Comprehensive Conservation and Management Plan, called Vision 2032. This plan will be crafted using a community-driven, cooperative process that reflects the best available science and diverse local voices.

Vision 2032 will deliver a focused regional call to action for shared efforts over the next ten years that can measurably improve the region’s water quality, wildlife, and quality of life. It will feature a set of achievable actions for solving priority problems facing our estuaries and watersheds.

2019 HIGHLIGHTS

Hired a new Program Director and GIS/Watershed Specialist.

Added 7 new partners to our Steering Committee, including municipalities and public health.

Upgraded our GIS capabilities and launched a public online data hub.

Provided $313K for nine watershed planning and restoration projects.

Began a year-long needs assessment for the Blackstone River Watershed.

Began work on Vision 2032.
