

NARRAGANSETT BAY ESTUARY PROGRAM

The Narragansett Bay Estuary Program is Seeking New Steering Committee Members

Provide vital input to **VISION 2032**
Build your network across multiple states
Stay up-to-date with new initiatives

four meetings per year · three-year term

SEEKING SPECIALIZED EXPERIENCE IN...

municipal stormwater and resilience · aquatic wildlife · fishing
social sciences · environmental justice · finance

SEEKING MEMBERSHIP THAT...

better represents the diversity of the region

VISION 2032 will be a realistic community-driven plan that will serve as a call to action for projects that can be completed within ten years to enhance the Narragansett Bay region's water quality, wildlife, and quality of life.

The NARRAGANSETT BAY ESTUARY PROGRAM is a partnership created by the Clean Water Act and governed by a diverse Steering Committee of regional interests including government, academic, nonprofit, and private. Working across boundaries, we bring people together, demystify science, and fund collective local action. Our program creates the critical conditions that enable voluntary efforts that restore and protect the Narragansett Bay Region and its watersheds in Rhode Island, Massachusetts, and Connecticut.

See www.nbep.org for more information.
